

Chaitanya Patil

Data Analyst | Business Intelligence Analyst

Rochester, New York | chaitanyapatil827@gmail.com | (585)-910-7221 | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Data Analyst with experience using SQL, Python, Excel, Tableau, and Power BI to build dashboards, automate reporting, and support business decision-making. Skilled in data cleaning, KPI tracking, validation, and multi-source analysis, with experience translating stakeholder requirements into clear reports and actionable insights.

WORK EXPERIENCE

Data Analyst, El Dorado Hills, California
Crowd Doing, 09/2025 – Current

- Built and maintained Power BI and Tableau dashboards to support operational, compliance, and community-level reporting across 3,000+ U.S. counties.
- Developed SQL-based data models integrating 200+ indicators from multiple sources, improving reporting consistency, traceability, and data reliability.
- Partnered with cross-functional stakeholders to define and standardize KPIs aligned with reporting and business requirements.
- Performed data cleaning, validation, and deduplication to improve reporting accuracy and reduce manual review effort.

Data Analyst, Mumbai, India
Dev Incepts, 07/2022 – 07/2023

- Built SQL-based reports and dashboards to support KPI tracking, operational reporting, and performance analysis.
- Worked with business and technical stakeholders to gather reporting requirements and translate them into dashboards, queries, and recurring reports.
- Created data quality checks and validation processes to improve reporting reliability and reduce disruptions.
- Automated ETL and reporting workflows using SQL and dbt, improving refresh efficiency and reducing manual reporting effort.

TECHNICAL SKILLS

- SQL:** Joins, CTEs, window functions, aggregations, query optimization, KPI tables, data modeling.
- Python:** pandas, NumPy, automation, data cleaning, regression, ARIMA, anomaly detection.
- BI & Visualization:** Tableau, Power BI, Looker, dashboard development, KPI design, drill-down reporting.
- Excel:** PivotTables, Power Query, lookup functions, charts, reporting support.
- Analytics:** Hypothesis testing, regression, forecasting, cohort analysis, A/B testing.
- Data & ETL:** dbt, ETL workflows, Snowflake, BigQuery, data validation, scheduling.

PROJECTS

EPL Squad Budget Intelligence Platform [Live Demo](#)

- Reviewed four seasons of data for 20 clubs and built Python and SQL metrics (WES, WPM, ECO) to clean and compare performance vs. pay, uncovering over \$10M in wage inefficiencies.
- Designed a clean data model, launched Tableau dashboards with fast drill-downs to accelerate budget and roster decisions, and delivered the results as a web report.

FIFA World Cup Viewership Analytics Platform (2010–2022) | [Live Demo](#)

- Built an end-to-end sports analytics dashboard analyzing global World Cup viewership trends using JavaScript, Chart.js, and custom KPI modeling.
- Computed advanced metrics including growth rate, CAGR, and anomaly detection to identify high-impact tournaments and audience shifts.
- Developed trend forecasting models to estimate future tournament viewership based on historical patterns.
- Delivered a storytelling-driven dashboard with interactive visualizations, improving insight accessibility and decision-making clarity.

Sentiment X – AI-Powered Stock Screener [Live Demo](#)

- Engineered real-time ingestion for 500+ tickers by combining technical indicators with VADER sentiment to produce JSON outputs and dashboards used for trend analysis.
- Created a retrieval-augmented generation pipeline with FAISS and OpenAI embeddings for company question answering over stock and news data, which improved answer relevancy and event discoverability.

EDUCATION

Rochester Institute of Technology,	Rochester, NY
Master of Science in Information Technology and Analytics (Cumulative GPA – 3.60/4.0)	08/2023 – 05/2025
University of Mumbai,	Mumbai, India
Bachelor of Engineering in Information Technology (Cumulative GPA – 3.45/4.0)	08/2018 – 06/2022
